- 3 **Database:** MySQL
- 4 **Technologies:** REST APIs, WebRTC, React Native Notifications, RFID
- 5 **Integration (ESP 32)**
Other: Social Media Post Design, Responsive Web Design, System Design

Key Projects

SaaS Marketplace Platform (Store Builder System) Developed a multi-tenant SaaS platform that allows users to create online stores instantly without coding. Includes dynamic store creation, dashboards, product management, and admin control.

POS Restaurant System

Built a restaurant point-of-sale system with order management, billing, and product tracking features designed for fast and efficient restaurant workflows.

POS Market System

Created a market POS system supporting product inventory, sales operations, and reporting features for retail environments.

Language Learning Website

Developed an educational platform with structured learning levels, quizzes, and interactive content for language learners.
